

RAHUL PATEL

Full Stack .NET Developer

.NET 8 | APIs & Integrations | Distributed Applications | Event-Driven Architecture | On-Premises & Cloud Deployment
Surat, Gujarat, India | rahulkantipatel10@gmail.com | +91 9099991125 | <https://www.linkedin.com/in/rkp1125/>

PROFESSIONAL SUMMARY

Results-driven .NET Developer with 4+ years of software development experience building enterprise and FinTech applications using C#, ASP.NET Core, distributed application concepts, and socket-based programming. Experienced in designing scalable backend services, asynchronous processing, REST API integrations, and evolving complex production codebases in on-premises environments. Hands-on experience with CQRS and working knowledge of Domain-Driven Design, with a strong track record of leading cross-functional teams, delivering reliable integrations, and supporting production systems.

TECHNICAL SKILLS

Backend Technologies: C#, .NET 8, .NET Core, .NET Framework 4.5, ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, ADO.NET, LINQ, Worker Services, REST APIs, SOAP/XML, Webhooks

Frontend: Angular, AngularJS, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, jQuery

Databases: SQL Server, PostgreSQL, ClickHouse

Messaging & Caching: RabbitMQ, Kafka, Redis

DevOps & Deployment: Azure DevOps CI/CD, GitLab CI/CD, IIS, SSL, OpenTelemetry, SigNoz, Postman, Visual Studio, VS Code, TFS

API Integrations: BSE SmartMF REST APIs, SOAP & Webhook Services, TechExcel APIs, CMOTS & M2M APIs, External System Integrations

Architecture & Concepts: Microservices Concepts, Distributed Application Concepts, Event-Driven Architecture, CQRS, Domain-Driven Design (DDD)

Security & Compliance: VAPT, Secure coding practices, SEBI compliance, Audit remediation

Domain: FinTech: Mutual Funds (BSE SmartMF), Bonds, IPOs, Broker management; e-Discovery; nopCommerce

PROFESSIONAL EXPERIENCE

Senior Full Stack .NET Developer (Team Lead) | [Jainam Broking Limited](#) | Surat, Gujarat

Oct 2024 – April 2026

Distributed Architecture & Backend Services

- Architected and built a next-generation FinTech platform using .NET 8 Web API, Onion Architecture, and Dependency Injection, improving modularity, testability, and maintainability across a distributed multi-application environment.
- Designed and implemented event-driven workflows and asynchronous background processing using .NET Worker Services, Webhooks, and parallel API processing, supporting reliable service communication and background data processing.
- Integrated Redis for in-memory caching, significantly improving response times and reducing load on SQL Server and downstream APIs across the platform.
- Implemented CQRS patterns for separating read and write concerns, improving scalability and query performance on high-throughput transaction processing workflows.
- Designed automated data ingestion pipelines integrating BSE, CMOTS, and M2M APIs for real-time scheme, holdings, and investor profile synchronization.
- Built high-performance SQL-based scheduled jobs, automation scripts, and internal .NET utilities for MTF ledger processing, financial calculations, and TechExcel API integration - eliminating significant manual operational effort.

Platform Ownership & Leadership

- Assumed ownership of critical FinTech platforms following a senior team transition, ensuring zero business disruption and full system stability.
- Led a cross-functional team of 5 developers across Backend and Angular — responsible for task allocation, code reviews, mentoring, technical decisions, delivery coordination, and production issue resolution.
- Translated complex business and compliance requirements into scalable technical solutions in collaboration with stakeholders, product owners, and external vendors.

Legacy System Evolution & API Integrations

- Maintained and evolved the Galaxy Mutual Fund platform (ASP.NET MVC .NET 4.5, BSE Star MF V1 SOAP services) alongside new platform development - demonstrating ability to work across legacy and modern codebases simultaneously.
- Integrated BSE SmartMF REST APIs and Webhook services for real-time transaction processing, investor data synchronization, and automated event-driven workflows.
- Implemented Micro-Frontend Architecture in Angular 19 and IndexedDB caching for MF scheme data, reducing redundant API calls and improving frontend scalability.
- Worked across interconnected applications covering Mutual Funds, IPOs, Bonds, Corporate Actions, Onboarding, Ledger, and broker operations through the centralized JPlus portal.

CI/CD, Deployment & Security

- Designed and implemented CI/CD pipelines in Azure DevOps and GitLab, automating build and deployment across all on-premises IIS-hosted projects.
- Led repository migration from Azure DevOps to GitLab; managed IIS hosting, SSL configuration, and production environment setup.
- Participated in VAPT (Vulnerability Assessment & Penetration Testing); implemented security fixes and resolved all audit findings in compliance with SEBI requirements.
- Practised Agile/Scrum with Azure DevOps - sprint planning, backlog refinement, code reviews, and continuous delivery.

Key Technologies: .NET 8, ASP.NET Core Web API, ASP.NET MVC, Worker Services, Redis, RabbitMQ, Kafka, SQL Server, ClickHouse, Angular 19, AngularJS, Azure DevOps, GitLab, IIS, BSE SmartMF, CMOTS, M2M APIs, Micro-Frontend, DDD, CQRS, Onion Architecture

Freelance .NET Developer & Consultant | NopCypher (Self-Employed) | Surat, Gujarat

Dec 2020 – Jul 2024

- Built custom nopCommerce plugins, REST APIs, and enterprise solutions as a freelance .NET consultant.
- Managed end-to-end software delivery including requirements gathering, development, deployment, and client support.
- Concurrently managed family-run businesses in agriculture, fishery, and land brokering, digitizing operations and improving business efficiency.
- Maintained continuous skill advancement in .NET Core, Angular, distributed systems, and cloud technologies throughout this period.

Software Engineer | Casepoint LLC | Surat, Gujarat

Sep 2018 – Nov 2020

- Developed core modules for an enterprise e-Discovery platform used by corporate and legal teams globally — gaining hands-on experience working in and evolving a large, existing distributed codebase.
- Built and maintained document review workflows, role-based access control (RBAC), and full audit trail features using ASP.NET MVC and PostgreSQL/SQL Server.
- Gained hands-on experience with RabbitMQ-based asynchronous messaging for background jobs, document processing, service-to-service communication, and indexing workflows.
- Optimized queries and stored procedures, improving document indexing and retrieval performance across an enterprise-scale system.
- Provided L2/L3 production support - triaging, debugging, and resolving live issues with minimal downtime; maintained SLA compliance for enterprise clients.
- Collaborated in Agile/Scrum teams across 2-week sprints; participated in sprint planning, daily standups, code reviews, and retrospectives.
-

CERTIFICATION

NISM Series V-B - Mutual Fund Foundation Certification

National Institute of Securities Markets (NISM)

EDUCATION

Bachelor of Engineering - Information Technology

SVMIT (Shri S'ad Vidya Mandal Institute of Technology), Bharuch, Gujarat | 2010 – 2015
